

Overview of the new PMDPro

Fall 2011 Member Meeting

Optional Half-day workshop,

Thursday October 13th

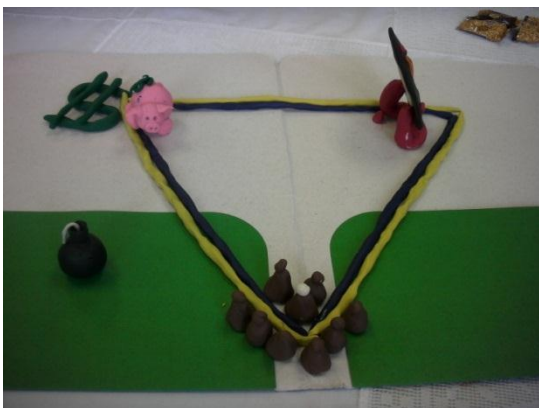

Fee: \$35 (includes materials and lunch)

[John Cropper](#), LINGOs' Director of PM Services, founder of the PM4NGOs LinkedIn group will present the new version of [PMDPro](#) – including an overview and an explanation of where it has come from, why it is needed. This is a chance to get answers to any and all questions about PMDPro – so make sure you talk with colleagues in programme and project departments/functions to get a good list of YOUR organization's questions, issues and challenges!

Above all, John will work with the group to discuss the challenges of moving from training and certification to actual improvements in project management performance and encourage participants to share their concerns and experiences. John will share LINGOs' experience of doing this with a range of organisations – large iNGO to small, local NGOs in a variety of contexts. By the end of this half day workshop, participants will have a clear understanding of:

- The new, updated version of PMDPro.
- How certification can help NGO project management.
- What to consider in terms of managing change to improve project performance in your organisations.
- Ways their organization can engage with PMD Pro.

The triple constraint illustrated in clay
